

## Science 9 ReTest Sections – Chapter 6-7 ReTest

Highlight the reTest sections that you plan to write, so that on the day of the reTest you will remember which sections to write.

- If your original mark was “IE” or “EMG”, you **MUST** rewrite the section.
  - If your original mark was “EM/DE” or “DEV”, you **should** rewrite the section, but it’s not absolutely required.
  - If your original mark was “DE/PR”, it’s **optional** to rewrite the section.
  - If your original mark was “PRF” or “EXT”, you should **NOT** rewrite the section.
- 
- **Section A:** Properties of the Periodic Table (original test Multiple Choice #1 to 13)
  - **Section B:** History of Atomic Models (original test Multiple Choice #14 to 20)
  - **Section C:** Atomic Structure (original test Multiple Choice #21 to 39)
  - **Section D:** Metal or non-metal (based on location on the periodic table) and number of atoms in a compound (based on the chemical formula for the compound) (original test Problems 1 and 2)
  - **Section E:** Atomic Structure (original test Problem 3)
  - **Section F:** Ion Structure (original test Problem 4)
  - **Section G:** Valence and Reactivity (original test Problems 5 and 6)
  - **Section H:** Bohr Diagrams (original test Problem 7)
  - **Section I:** Standard Notation (original test Problems 8 and 9)
  - **Section J:** Ionic Compounds (original test Problems 10 to 12)
  - **Section K:** Atomic Spectra (original test Problem 13)
